IOWA HEALTH CARE

PODIUM PRESENTATION DETAILS

33rd National EBP Conference April 29 – 30, 2026

March 10, 2026: **PowerPoint presentation due to kristen-rempel@uiowa.edu**
(pdf shared on conference platform)

Presentation Details

- Presentation is 15 minutes plus 5 minutes for questions and answers.
- Suggested font size: headings 28 points or larger and content 20 points or larger.
- Remember to include an acknowledgement of your team.
- A PC with projection will be provided. *Do not plan to use your personal laptop.* If you require any other equipment, contact kristen-rempel@uiowa.edu by March 10, 2026.
- If you are unable to present, you must provide a substitute presenter.
- State conflict of interest (or no conflict of interest), intellectual bias, and use of artificial intelligence (AI) on slide 1 or 2 (e.g., no conflicts of interest, recognized personal intellectual bias, limited use of AI for slide images only).
- Include citations and references.
- The conference committee will make every effort to successfully display your PowerPoint presentation but will not be held responsible for errors due to incompatibility issues or technology malfunctions.
- **PowerPoint presentation must be submitted by March 10, 2026** to kristen-rempel@uiowa.edu, and a pdf will be shared on the conference platform.

Presentation Content

Presentations should include the following content based on the type of project/study. Please see additional resources on the conference website in the Podium and Poster Presenters section.

Evidence-based practice project presentation content should include:

- **Purpose, Rationale, and EBP Model:** State the project purpose, rationale (e.g., incidence or prevalence or significance of the problem), and EBP model used.
- **Synthesis of Evidence:** Provide a synthesis of the available evidence supporting recommendations for practice.
- **Practice Change and Implementation Strategies:** Describe the practice change (e.g., evidence-based intervention) and key implementation strategies used to promote adoption and sustain the practice change.
- **Evaluation:** Describe baseline and post-pilot or trended data from both process and outcome indicators and findings.
- **Conclusions:** Summarize the implications for practice.

Clinical research study presentation content should include:

- **Background:** Provide a background of the problem and current knowledge gap.
- **Research Question or Aims:** State the research question or aims.
- **Methods:** Describe the study design, sample, measures, and analyses.
- **Results:** Describe data and findings.
- **Conclusions:** Summarize the implications for practice.

Synthesis report presentation content should include:

- **Topic:** Provide a brief description of the clinical topic and importance.
- **Team:** State the representation of appropriate experts on the team and management of conflicts.

- **Methods:** Describe the search process, procedures for assessing individual studies, and synthesis.
- **Findings:** Describe the specific practice recommendations: strength of each recommendation and certainty of benefit using an established system (e.g., U.S. Preventative Services Task Force or Grading of Recommendations Assessment, Development, and Evaluation).
- **Conclusions:** Summarize the implications for practice.

Please contact kristen-rempel@uiowa.edu with any questions.
