

# “x + y” schedule

---

The residency emphasizes a broad experience in clinical neurology with appropriate time spent in direct patient care. The program is based on inpatient, outpatient, and consultation rotations within the department and in other departments whose specialties are required for board eligibility.

The schedule is based on the “x + y” model. Residents are on rotations during the “x” weeks such as inpatient teams, consultation service, outpatient clinics, or electives followed by the “y” week which consists of COC clinics and specialty clinics.

Residents are on a night float rotation for overnight call. Night float is 6 nights in a row, occurring every ~ 8 weeks for PGY2 residents and every ~12 weeks for PGY3 and PGY4 residents.

A sample schedule is posted below.

COC- Continuity of Care Clinics

ED- Emergency Department

EEG- Electroencephalography

EMG- Electromyography

EMU- Epilepsy Monitoring Unit

SNICU- Surgical and Neuroscience Intensive Care Unit

NIS- Neurointerventional Surgery
