

EVIDENCE-BASED PRACTICE CONFERENCE

Hyatt Regency Hotel & Conference Center | Coralville, Iowa

Wednesday, April 17 - Thursday, April 18, 2024

Innovation in Evidence-Based Practice**PURPOSE**

Nurses and frontline clinicians have always been innovators in discovering practice solutions. Today, in healthcare, we are challenged in new ways to innovate and deliver evidence-based practice (EBP) using timely and meaningful methods across populations and settings. This is a critical time to embrace innovations developed for healthcare delivery, while remaining adaptive to new technology. Innovation in EBP goes beyond traditional healthcare practices to open minds for innovative thinking and exploring new possibilities. Learn how innovation can turn a hot button topic into actionable results.

Conference participants will learn cutting-edge developments in application of innovation in EBP for improved design of practice changes; adoption of best evidence; and benefits for diverse patients, clinicians, and organizations. Innovative clinical issues will be discussed with reports on evidence-based solutions across settings. Participants will have opportunities to network with EBP experts and enthusiasts. The program is designed to meet the needs of practicing nurses, interprofessional team members, leaders, faculty, and experts.

OBJECTIVES

- Discover new pathways and innovative approaches for EBP.
- Describe strategies for engaging patients, clinicians, and communities in EBP.
- Facilitate networking to advance application of EBP to improve health care outcomes.

KEYNOTE SPEAKERS

ORIANA BEAUDET, DNP, RN, FAAN

Dr. Beaudet is the vice president of Nursing Innovation and works across the ANA Enterprise (American Nurses Association, American Nurses Credentialing Center, and the American Nurses Foundation) to support the development of nurses and healthcare innovation. This starts with unlocking the exclusivity of the innovation process. Dr. Beaudet's goal is to support nurses to build and lead innovation initiatives across every aspect of the health care ecosystem.

KENRICK CATO, PHD, RN, CPHIMS, FAAN, FACMI

Dr. Cato is a Professor of Informatics at the University of Pennsylvania School of Nursing and a Nurse Scientist for Pediatric Data and Analytics at Children's Hospital of Philadelphia.

Dr. Cato is a respected creator and evaluator of decision-support tools. He is a clinical informatician whose research focuses on applying state-of-the-art data science methods to electronic patient data to support decision-making for clinicians, patients, and caregivers.

He is the author of over 100 publications, with a number of notable awards. He was awarded the Bronze Star from the United States Army in 2005, elected to the New York Academy of Medicine in 2015, the American Academy of Nursing in 2019, and the American College of Medical Informatics in 2023.
