Determination of educational content for this program and the selection of speakers are responsibilities of the program director and planning committee. Firms providing financial support did not have input in these areas. Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Department of Nursing in advance at (319) 356-1238.

**Disclosure Policy:** Everyone in a position to control the content of this educational activity will disclose to the CE provider and to attendees all relevant financial relationships with any commercial interest. They will also disclose if any pharmaceuticals or medical procedures and devices discussed are investigational or unapproved for use by the U.S. Food and Drug Administration (FDA).

The UI Hospitals & Clinics Department of Nursing’s continuing education programs are developed under the supervision of Lou Ann Montgomery, PhD, RN, BC.
Education Objectives
Upon completion of this program learner should be able to:

- Describe the various surgeries performed for ulcerative colitis and Crohn’s Disease.
- Discuss the use of fecal transplants in the management of clostridium difficile infection.
- Review the presentation and management of intestinal failure with a focus on short bowel syndrome.
- Summarize the importance of clinical research in providing the best options of care for patients and their families.
- Discuss new developments and targets of therapy in current weight management.
- Review liver enzyme abnormalities and determine different types of liver diseases based on enzyme abnormalities.
- Describe the prescribed diet for pre and post-operative patients in the UIHC bariatric surgery program.
- List the indications for use of enteral stents.
- Review the interpretation of tests for viral hepatitis.
- Summarize the nutritional needs of patients with gastrointestinal disease and alteration.

Credit
