Changing lives.

Through its commitment to innovation, interdisciplinary collaboration, quality, safety, and service, UI Health Care:

- Educates and trains the next generation of physicians and health care providers
- Fosters collaborations with health systems and providers across Iowa and the region
- Provides world-class medical care and expertise to patients, families, and communities
- Seeks knowledge and discoveries that advance biomedical science, leading to improved treatments and therapies

University of Iowa Health Care is

Iowa’s comprehensive academic health system:

- UI Hospitals & Clinics, which includes
  UI Stead Family Children’s Hospital
- UI Roy J. and Lucille A. Carver
  College of Medicine
- UI Physicians

Changing medicine.
Changing lives.
Changing medicine and changing lives is our mission of education and training, research and discovery, and patient care and service.

The year 2018 featured notable accomplishments and distinctions, including:

- **Over 1 million clinic visits and nearly 37,000 acute admissions** at UI Hospitals & Clinics
- **Nearly $225 million in external research funding** to Carver College of Medicine investigators
- **A fourth consecutive designation as a Magnet hospital** by the American Nurses Credentialing Center for excellence in nursing
- **A No. 1 ranking from Forbes** as the “Best Employer for Diversity” in the Healthcare & Social category, and No. 16 ranking overall among 250 employers nationwide, in 2018
- **Official notification of full reaccreditation** of the Carver College of Medicine MD program from the Liaison Committee on Medical Education
- **National recognition by U.S. News & World Report** in its rankings of 2019 “Best Graduate Schools” and 2018–19 “Best Hospitals” and “Best Children’s Hospitals”
- **The 10th anniversary of our Kid Captain program**, a partnership between UI Stead Family Children’s Hospital and the Iowa Hawkeyes to honor pediatric patients

It also was a time of transition in leadership, as Kenneth P. Kates, MBA, associate vice president for UI Health Care and CEO of UI Hospitals & Clinics, retired after a decade of service to the organization. Kates’ impact was reflected in the growth of patient care volumes, new facilities and technologies, and an unwavering commitment to quality, safety, and operational efficiencies, throughout the patient care enterprise.

In late November 2018, Suresh Gunasekaran, MBA, began as the new associate vice president for UI Health Care and CEO of UI Hospitals & Clinics, coming to Iowa from the University of Texas Southwestern Health System.

Gunasekaran joins Brooks Jackson, MD, MBA, University of Iowa vice president for medical affairs and dean of the Roy J. and Lucille A. Carver College of Medicine; Patricia Winokur, MD, executive dean of the Carver College of Medicine; and others in changing medicine and changing lives for patients and families, students and trainees, faculty and staff, and colleagues and partners here in Iowa and around the world.

That’s the change we pursue—and the challenge we embrace—every day.
Changing the future of health care through innovation, integration, and individualization

In addition to its MD program, the UI Carver College of Medicine offers degrees in physician assistant studies, physical therapy, and medical education as well as PhD programs in nine biomedical science areas and bachelor’s degree programs in clinical laboratory sciences, nuclear medicine, and radiation sciences.
More than 30 major research centers, institutes, and programs, including:

- Abboud Cardiovascular Research Center
- Carver Family Center for Macular Degeneration
- Center for Auditory Regeneration and Deafness
- Cystic Fibrosis Research Center
- Fraternal Order of Eagles Diabetes Research Center
- Helen C. Levitt Center for Viral Pathogenesis and Disease
- Holden Comprehensive Cancer Center
- Institute for Clinical and Translational Science
- Institute for Vision Research
- Iowa Institute of Human Genetics
- Iowa Neuroscience Institute
- Neuroendocrine Tumor Spore Center
- Pappajohn Biomedical Institute
- Wellstone Muscular Dystrophy Cooperative Research Center

UI Health Care faculty and staff are nationally recognized leaders in basic science research that enhances understanding of human health and disease, and clinical studies that test new medical technologies, treatments, and devices.
