

# Transfer to a NICU Closer to Home

It is our pleasure to care for you and your baby. We plan to continue caring for your baby for as long as they need. Sometimes you can transfer to a NICU closer to your home before your baby is ready for discharge.

- There are many other NICUs in Iowa. They can take excellent care of your baby.
- Your baby will need to meet specific criteria to qualify for transfer.
- The medical team will work with you to decide if and when your baby meets these criteria.
- Insurance and other details will need to be worked out before the transfer is accepted. Social work and the nursing team help with these.
